

# Nokyung - Version History

## **2024-02-28 (SIL WSTech Team) 2.000**

- Added kerning
- Added two new weights (Medium and SemiBold)
- Added space characters needed for publishing

## **2018-09-27 (SIL Non-Roman Script Initiative) 1.491 (test release)**

- Switched to UFO3+designspace
- No resulting changes in font

## **2017-05-05 (SIL Non-Roman Script Initiative) 1.490 (test release)**

- Completed the Bold weight
- Revised some Regular glyphs - note that due to slight width changes documents may reflow!
- Added WOFF versions
- Intended for development and testing

## **2016-01-28 (SIL Non-Roman Script Initiative) 1.302**

- Small documentation adjustments
- Removed 'SIL' as a Reserved Font Name
- More work on Bold (but still not finished)
- Unencoded dotted circle (U+25CC) to work around a Windows 7 problem

## **2015-06-02 (SIL Non-Roman Script Initiative) 1.300**

- Increased default line metrics
- Changed descender design
- Revised all punctuation
- Regular only
- Should still be considered experimental

## **2015-04-03 (SIL Non-Roman Script Initiative) 1.200**

- First release based on Github project
- Regular only
- Should still be considered experimental
